

Pet Vaccination Schedule

Introduction: Vaccinations are a crucial part of keeping your pet healthy. They protect against common and potentially deadly diseases. This schedule provides a guideline for core and optional vaccines throughout your pet's life.

Puppy/Kitten Vaccine Schedule:

Age	Vaccine	Notes
6-8 weeks	Distemper, Parvovirus	Start core vaccines
10-12 weeks	DHPP (Distemper, Hepatitis, Parvo, Parainfluenza), FVRCP (for cats)	Booster shots
12-16 weeks	Rabies	Legally required in most regions
14-16 weeks	Final DHPP or FVRCP booster	Complete primary series

Adult Dog/Cat Booster Schedule:

- DHPP or FVRCP: Every 1-3 years
- Rabies: Every 1-3 years (depending on local laws)
- Bordetella (optional): Every 6–12 months
- Leptospirosis (optional): Annually

Tips:

- Keep a vaccination record
 - Schedule annual vet checkups
 - Discuss lifestyle and risk factors with your vet
-
